Summary of Skills and Abilities

React.js & Next.js

- Strong command over React fundamentals including state management(Redux), component lifecycle, and hooks. Capable of developing complex UIs efficiently.
- Experience in building scalable and SEO-friendly applications. Proficient in server-side rendering, API routes, and dynamic routing.

Node & Express

- Extensive experience in developing RESTful APIs and web applications using Express.js
- Skilled in integrating various databases (e.g MongoDB, MySQL, PostgreSQL) with Node.js and Express, using ORMs like typeORM, Prisma,Mongoose.
- Expertise in asynchronous JavaScript, utilizing features like callbacks, Promises, and async/await for non-blocking I/O operations, ensuring optimal application performance.
- Understanding of deploying Node.js and Express applications on various hosting platforms (e.g. DigitalOcean) and familiarity with basic DevOps practices like CI/CD and Docker.

Personal Skills

- A keen approach to learning
- Handling errors and learning from it
- Reliable and team player
- Working to short lead times

Employment History

Organization	**:**	**Annapurna Cloud Technology**
Job Title	**:**	**Jr. Full Stack Developer**
Duration	**:**	**September 2022- June 2023**

Technical Environment: React ,Node, Typescript,MySQL,MySQL workbench,MongoDB. Digital Ocean

Contributions:

- Developed complex feature modules using React & Next.
- Engineered RESTful APIs in Express.js, leveraging TypeScript, and integrating with databases such as MySQL and MongoDB
- Involved in deployment procedure using Digital Ocean
